

EventHub Acceptance Tests

Delete Inappropriate Event

Test Case ID: ATC-001

User Story: As an admin, I want to delete inappropriate or policy-violating events

Scenario: Correct flow

Preconditions:

- Admin account exists with valid login credentials (admin@example.com / AdminPass123).
- At least one event exists in the system (Event ID: 101, Name: "Test Event A").

Test Data:

- Admin username: admin@example.com
- Admin password: AdminPass123

Event to delete:

- ID: 101
- Name: Test Event A
- Date: 2025-09-25
- Location: Melbourne

Steps:

1. Login as admin with valid credentials.
2. Navigate to the Admin Dashboard.
3. Select Manage Events from the dashboard menu.
4. Verify the events table is displayed in alphabetical order.
5. Use the search bar to search for "Test Event A".
6. Open the detail view for "Test Event A".
7. Click the Delete button.
8. When the confirmation modal appears, click Confirm.

Expected Results:

- "Test Event A" is deleted from the system and no longer appears in the events list.
- A confirmation message is displayed: "Event deleted successfully."
- Admin is redirected back to the Manage Events page.

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as admin (admin@example.com / AdminPass123)	Admin is logged in successfully	Admin logged in successfully	Pass
2	Open Manage Events	Select "Manage Events" from menu	Events table is displayed in alphabetical order	Events table displayed in alphabetical order	Pass

3	Search Event	Search for "Test Event A"	"Test Event A" appears in search results	"Test Event A" appeared in search results	Pass
4	Open Event Detail	Click on "Test Event A" detail view	Event detail view is displayed	Event detail view displayed	Pass
5	Delete Event	Click Delete button on detail view	Confirmation modal is displayed	Confirmation modal displayed	Pass
6	Confirm Deletion	Click Confirm in modal	Event is removed from system	Event removed from system	Pass
7	Verify List	Check events list for "Test Event A"	"Test Event A" is no longer in the list	"Test Event A" no longer in the list	Pass

Working Navigation Bar

Test Case ID: ATC-002

User Story: As a logged-in user, I want to navigate through the application using the navigation bar

Scenario: Correct flow

Preconditions:

- User account exists with valid login credentials.
- User is logged in and on any page except the sign-in/sign-up pages.
- Navigation bar is displayed at the top of the page with links to major sections.

Test Data:

- Username: student@example.com / organiser@example.com
- Password: StudentPass123 / OrganiserPass123

Steps:

1. Login with valid credentials.
2. Verify that the navigation bar is visible at the top of the page.
3. Click on each navigation link (All Events, All Clubs, Escape Hatch)
4. Verify the application redirects to the correct page for each link.
5. Verify that a 'My Account' dropdown button is displayed.
6. Check that the dropdown menu updates based on the user type:
 - Student sees: 'My RSVPs'
 - Organiser sees: 'My Clubs'
7. Resize the browser window to test responsiveness.
8. Navigate to multiple pages and ensure the navigation bar remains visible and functional.

Expected Results:

- Clicking each link redirects the user to the correct page.
- 'My Account' dropdown is displayed and shows the correct options based on user type.
- Navigation bar remains functional and visible on all pages and screen sizes.
- No broken links or layout issues occur during navigation.

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Username: student@example.com / Password: StudentPass123	User is logged in successfully	User is logged in successfully	Pass
2	Verify navbar	Confirm navigation bar is visible at the top of the page	Navigation bar is displayed at the top of the page	Navigation bar is displayed at the top of the page	Pass
3	Click All Events link	Click the All Events link in the navigation bar	User is redirected to the All Events page	User is redirected to the All Events page	Pass
4	Click All Clubs link	Click the All Clubs link in the navigation bar	User is redirected to the All Clubs page	User is redirected to the All Clubs page	Pass
7	Verify My Account dropdown	Check that 'My Account' dropdown is displayed	Dropdown is displayed	Dropdown is displayed	Pass
8	Check dropdown options	Student user sees 'My RSVPs' Organiser user sees 'My Clubs'	Dropdown shows correct option for user type	Dropdown shows correct option for user type	Pass
9	Resize window	Test navigation bar responsiveness on different screen sizes	Navigation bar remains visible and functional	Navigation bar remains visible and functional	Pass
10	Navigate multiple pages	Move between pages to ensure navbar persists	Navigation bar remains visible and functional	Navigation bar remains visible and functional	Pass

Admin-Dashboard Landing Page**Test Case ID:** ATC-003**User Story:** As an admin, I would like a central page to manage events, clubs, and users so that I can monitor the integrity of the platform**Scenario:** Correct Flow**Preconditions:**

- Admin account exists with valid login credentials (admin@example.com, AdminPass123)
- At least one event, one user, and one club exist in the system //data

Test Data:Admin username: admin@example.com

Admin password: AdminPass123

Event:

- ID: 101
- Name: "Test Event A"
- Date: 2025-09-25
- Location: Melbourne

User:

- Name: "John Doe"
- Email: john@example.com

Club:

- ID: 301
- Name: "Chess Club"

Steps:

1. Login as admin with valid credentials.
2. Verify successful login and redirection to the Admin Dashboard.
3. Check that the dashboard displays three buttons: "Manage Events", "Manage Users", "Manage Clubs".
4. Click "Manage Events" and verify the events page displays existing events.
5. Click "Manage Users" and verify the users page displays registered users.
6. Click "Manage Clubs" and verify the clubs page displays created clubs.

Expected Results:

- Admin is redirected to the Admin Dashboard after login.
- The dashboard displays three buttons: "Manage Events", "Manage Users", "Manage Clubs".
- Clicking each button correctly redirects to the respective management page.
- Each management page correctly lists the existing data in the system.

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as admin (admin@example.com / AdminPass123)	Admin is redirected to the Admin Dashboard	Admin is redirected to the Admin Dashboard	Pass
2	Verify Dashboard Buttons	Check that "Manage Events", "Manage Users", "Manage Clubs" buttons are displayed	All three buttons are visible	All three buttons are visible	Pass
3	Manage Events Navigation	Click "Manage Events" button	Redirected to events management page, events listed	Redirected to events management page, events listed	Pass

4	Manage Users Navigation	Click "Manage Users" button	Redirected to users management page, users listed	Redirected to users management page, users listed	Pass
5	Manage Clubs Navigation	Click "Manage Clubs" button	Redirected to clubs management page, clubs listed	Redirected to clubs management page, clubs listed	Pass

Manage Users Page

Test Case ID: ATC-004

User Story: As an admin, I want to manage user accounts, including banning or deleting accounts

Scenario: Correct flow

Preconditions:

Admin account exists with valid login credentials (admin@example.com / AdminPass123)

At least one other user exists in the system (Email: [johndoe@example.com](mailto: johndoe@example.com), Name: "John Doe")

Test Data:

Admin username: [admin@example.com](mailto: admin@example.com)

Admin password: AdminPass123

User to manage:

- Name: John Doe
- Email: [johndoe@example.com](mailto: johndoe@example.com)
- Date Joined: 2025-01-15
- Participation History: ["Event A", "Event B"]
- Review History: []

Steps:

1. Login as admin with valid credentials.
2. Navigate to the Admin Dashboard.
3. Select Manage Users from the dashboard menu.
4. Verify the users table is displayed in alphabetical order.
5. Use the search bar to search for "John Doe".
6. Open the detail view for "John Doe".
7. Click the Ban button and confirm.
8. Click the Delete button and confirm.

Expected Results:

- "John Doe" is banned and cannot log in until reactivated.
- "John Doe" is deleted from the system and no longer appears in the users list.
- Admin is redirected back to the Manage Users page.

Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as admin with username: admin@example.com, password: AdminPass123	Admin is logged in successfully	Admin is logged in successfully	Pass
2	Navigate to Dashboard	Go to Admin Dashboard	Dashboard is displayed with Manage Users button	Dashboard is displayed with Manage Users button	Pass
3	Open Manage Users	Click on Manage Users button	User table is displayed in alphabetical order	User table is displayed in alphabetical order	Pass
4	Search User	Use search bar to search for "John Doe"	User "John Doe" appears in search results	User "John Doe" appears in search results	Pass
5	Open User Detail	Click on "John Doe" in table	Detailed user page opens showing Email, Date Joined, Participation History, Review History	Detailed user page opens showing Email, Date Joined, Participation History, Review History	Pass
6	Ban User	Click Ban button and confirm	User is banned and cannot log in until reactivated	User is banned and cannot log in until reactivated	Pass
7	Delete User	Click Delete button and confirm	User is deleted from the system and no longer appears in the user list	User is deleted from the system and no longer appears in the user list	Pass
8	Redirect	Verify admin is redirected after actions	Admin is redirected back to Manage Users page	Admin is redirected back to Manage Users page	Pass

Search Events

Test Case ID: ATC-005

User Story: As a student, I want to search events by keywords so I can find specific events more efficiently.

Scenario: Correct flow

Preconditions:

- Student account exists with valid login credentials (student@example.com/StudentPass123).
- At least three events exist in the system:
 - Event ID: 201, Name: "Music Festival", Description: "Annual city music festival", Tags: ["music", "festival"], Date: 2025-10-10
 - Event ID: 202, Name: "Art Exhibition", Description: "Local artists showcase", Tags: ["art", "exhibition"], Date: 2025-09-25
 - Event ID: 203, Name: "Tech Talk", Description: "Discussion on latest technology trends", Tags: ["tech", "talk"], Date: 2025-09-30

Test Data:

- Student username: student@example.com
- Student password: StudentPass123
- Keywords to search: "Tech"

Steps:

1. Login as student with valid credentials.
2. Navigate to the events listing page or home page.
3. Verify the navigation bar is displayed with a search bar.
4. Enter the keyword "Tech" into the search bar.
5. Submit the search by pressing Enter.
6. Observe the list of events returned by the search.
7. Verify that the search results include events with matching title, description, or tags.
8. Enter the keyword "A@a!" into the search bar.
9. Submit the search by pressing Enter.
10. Verify no matching events are found and that a "No results found" message is displayed.
11. Clear the search input.
12. Verify that the full list of events is displayed again.

Expected Results:

- The system displays events matching the keyword "Tech"
- Search is case-insensitive and supports partial matches.
- Results are sorted by date.
- If no events match, a "No results found" message is shown.
- Clearing the search input returns the full event listing.

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as student with valid credentials (student@example.com / StudentPass123)	Student is logged in successfully	Student is logged in successfully	Pass
2	Navigate to events page	Go to the events listing page or home page	Events listing page is displayed	Events listing page is displayed	Pass

3	Verify search bar	Confirm the navigation bar displays a search bar	Search bar is visible in navigation bar	Search bar is visible in navigation bar	Pass
4	Enter keyword	Enter the keyword "Tech" into the search bar	Keyword "Tech" is entered	Keyword "Tech" is entered	Pass
5	Submit search	Press Enter to submit the search	Search is submitted	Search is submitted	Pass
6	Observe results	View the list of events returned	Events matching "Tech" are displayed	Events matching "Tech" are displayed	Pass
7	Verify matching	Verify that results match title, description, or tags	Matching events are displayed correctly	Matching events are displayed correctly	Pass
8	Enter invalid keyword	Enter the keyword "A@a!" into the search bar	Keyword "A@a!" is entered	Keyword "A@a!" is entered	Pass
9	Submit search	Press Enter to submit the search	Search is submitted	Search is submitted	Pass
10	Verify no results	Confirm that no matching events are found	"No results found" message is displayed	"No results found" message is displayed	Pass
11	Clear search	Clear the search input	Search input is cleared	Search input is cleared	Pass
12	Verify full listing	Confirm that full event listing is displayed	All events are displayed again	All events are displayed again	Pass

Manage Events Page

Test Case ID: ATC-006

User Story: As an admin, I want to view and manage all events so that I can ensure the quality and appropriateness of event content on the platform

Scenario: Correct flow

Preconditions:

- Admin account exists with valid login credentials (admin@example.com / AdminPass123)
- At least one event exists in the system (Event ID: 201, Name: "Music Festival")

Test Data:

- Admin username: admin@example.com
- Admin password: AdminPass123
- Event to view/edit:
 - ID: 201
 - Name: Music Festival
 - Date: 2025-10-10
 - Location: Melbourne

- Category: Music

Steps:

1. Login as admin with valid credentials.
2. Navigate to the events list page.
3. Verify the events table displays all events with key details: title, organiser, date, category, and status.
4. Use the search bar to search for "Music Festival".
5. Apply filters or sort events by title, description, tag, or location.
6. Select the "Music Festival" event to view full event details, including description, media, and RSVP list.
7. Click the Edit button and update the following fields: title, description, tag, location.
8. Save the changes.

Expected Results:

- All events are visible
- Events table shows correct details for each event
- Search, filter, and sort functionality works correctly
- Full event details are displayed accurately
- Edits are saved and reflected on the events page

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as admin with username: admin@example.com, password: AdminPass123	Admin is logged in successfully	Admin is logged in successfully	Pass
2	Navigate to events list page	Click on "Events" in the dashboard menu	Events list page is displayed with all events	Events list page is displayed with all events	Pass
3	Verify events table	Look for event details: title, organiser, date, category, status	Events table displays all events with correct key details	Events table displays all events with correct key details	Pass
4	Search for event	Use search bar to search for "Music Festival"	"Music Festival" appears in search results	"Music Festival" appears in search results	Pass
5	Filter/Sort events	Apply filters or sort by title, description, tag, location	Events are correctly filtered/sorted	Events are correctly filtered/sorted	Pass
6	View full details	Select "Music Festival" event to view details	Full event details including description, media, RSVP	Full event details including description, media, RSVP	Pass

			list are displayed	list are displayed	
7	Edit event	Click Edit and update title, description, tag, location	Fields are updated successfully	Fields are updated successfully	Pass
8	Save changes	Click Save/Update	Edits are saved and reflected on events page	Edits are saved and reflected on events page	Pass

Organiser-Dashboard Landing Page

Test Case ID: ATC-007

User Story: As a club organizer, I want to see a list of my upcoming events and the clubs I have created, so that I can efficiently manage both my clubs and their scheduled events.

Scenario: Correct flow

Preconditions:

- Club organizer account exists with valid login credentials (organizer@example.com / OrganizerPass123)
- The organizer has at least one event and one club created in the system:
 - Event: ID: 201, Name: "Music Festival", Date: 2025-10-10, Location: Melbourne
 - Club: ID: 301, Name: "Music Lovers Club", Description: "Club for music enthusiasts"

Test Data:

- Organizer username: organizer@example.com
- Organizer password: OrganizerPass123
- Event to display:
 - ID: 201
 - Name: Music Festival
 - Date: 2025-10-10
 - Location: Melbourne
- Club to display:
 - ID: 301
 - Name: Music Lovers Club
 - Description: Club for music enthusiasts

Steps:

1. Login as club organizer with valid credentials.
2. Complete the login process.
3. Verify the organizer is redirected to the Organiser Dashboard page.
4. Verify the page displays two buttons: "Manage Events" and "Manage Clubs".
5. Confirm the list of upcoming events created by the organizer is displayed.
6. Confirm the table of clubs created by the organizer is displayed.
7. Verify the search, filter, and sort functionalities work for the clubs table.
8. Click on a club to navigate to its detail page.
9. Verify the detail page allows editing or deleting the club.

Expected Results:

- Organizer is redirected to the Organiser Dashboard after login.

- "Manage Events" and "Manage Clubs" buttons are visible and clickable.
- Upcoming events list shows all events created by the organizer.
- Clubs table displays all clubs created by the organizer.
- Search, filter, and sort functions return correct results in the clubs table.
- Clicking a club navigates to the club detail page where edit/delete actions are available.

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as club organizer (organizer@example.com / OrganizerPass123)	Organizer logs in successfully	Organizer logs in successfully	Pass
2	Complete Login	Process the login and redirect to dashboard	Organizer is redirected to Organiser Dashboard	Organizer is redirected to Organiser Dashboard	Pass
3	Verify Buttons	Check that "Manage Events" and "Manage Clubs" buttons are visible	Buttons are visible and clickable	Buttons are visible and clickable	Pass
4	View Upcoming Events	Check list of upcoming events for organizer	Event "Music Festival" is displayed in the list	Event "Music Festival" is displayed in the list	Pass
5	View Clubs	Table of clubs created by organizer is displayed	Club "Music Lovers Club" is displayed in the table	Club "Music Lovers Club" is displayed in the table	Pass
6	Search/Filter/Sort	Use search, filter, and sort functions on clubs table	Functions return correct results	Functions return correct results	Pass
7	Navigate to Club Detail	Click on a club in the table	Navigates to club detail page	Navigation to club detail page successful	Pass
8	Edit/Delete Club	Verify edit and delete options exist on club detail page	Edit and Delete options are available	Edit and Delete options are available	Pass

Login to Access Website

Test Case ID: ATC-008

User Story: As a user, I want the ability to login to the Event Website with my credentials, so that I can access my personalised dashboard and perform role-specific actions.

Scenario: Successful Login Flow

Preconditions:

- User account exists in the database with valid credentials
- Website is accessible and sign-in page is functional
- Database contains hashed password for the test user

Test Data:

- Valid user email: student@rmit.edu.au
- Valid user password: StudentPass123
- User role: Student
- Expected dashboard: Student Dashboard
- Invalid email: invalid@test.com
- Invalid password: WrongPassword123
- Blank field scenarios: empty email and/or password

Steps:

1. Navigate to the sign-in page
2. Enter valid email address in the email field
3. Enter valid password in the password field
4. Click the "Sign In" button
5. Verify redirection to appropriate dashboard
6. Verify authentication token is stored in cookies

Expected Results:

- Valid credentials redirect to Student Dashboard
- Authentication token is generated and stored in cookies
- User gains access to role-specific features
- Blank fields display appropriate validation messages
- Invalid credentials display error message and remain on sign-in page

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Sign In	Navigate to sign-in "/sign-in"	Sign-in form is displayed with email and password fields	Sign-in form is displayed with email and password fields	Pass
2	Valid Email	Enter valid email: "student@rmit.edu.au"	Email field accepts input without validation errors	Email field accepts input without validation errors	Pass
3	Valid Password	Enter valid password: "StudentPass123"	Password field accepts input and	Password field accepts input and	Pass

			masks characters	masks characters	
4	Submit Login	Submit valid Login (click Sign In)	User is redirected to Student Dashboard. AuthToken is set in cookies	User is redirected to Student Dashboard. AuthToken is set in cookies	Pass
5	Verify Login	Verify Dashboard Access	Dashboard verifies the logged in user via the token	Dashboard verifies the logged in user via the token	Pass

View Detailed Event Page

Test Case ID: ATC-009

User Story: As a student, I want to be able to view the full event information, so that I can review correct details of event such as location and time

Scenario: Successful Event Detail Navigation Flow

Preconditions:

- Student account exists with valid login credentials (student@rmit.edu.au / StudentPass123)
- At least one event exists in the system and is displayed in the event list
- The event contains comprehensive information including all required fields

Test Data:

- Student username: student@rmit.edu.au
- Student password: StudentPass123
- Test Event Details:
 - Event ID: 201
 - Event Title: "Tech Innovation Workshop"
 - Date: 2025-10-15
 - Start Time: 10:00 AM
 - End Time: 4:00 PM
 - Location: Building 80, Level 9, Room 80.09.01, RMIT University
 - Description: "Learn about the latest technology trends and innovations in software development"
 - Category: STEM
 - RSVP Status: Not RSVP'd

Steps:

1. Login as student with valid credentials
2. Navigate to the event list page
3. Verify at least one event is displayed in the list
4. Click on "Tech Innovation Workshop" event from the event list
5. Verify navigation to event detail page

6. Verify all comprehensive event information is displayed correctly

Expected Results:

- Student successfully navigates from event list to event detail page
- Event detail page loads and displays all comprehensive information accurately
- All event fields are visible and properly formatted
- RSVP option is available since student has not RSVP'd yet

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login as student (student@rmit.edu.au/StudentPass123)	Student is logged in and redirected to dashboard	Student is logged in and redirected to dashboard	Pass
2	Event List	Navigate to Event List – Access event list page from dashboard or navigation menu	Event list page displays with the list of events	Event list page displays with the list of events	Pass
3	Verify the event	Verify that the “Tech Innovation Workshop” event appears in the list	"Tech Innovation Workshop" is visible in the event list	"Tech Innovation Workshop" is visible in the event list	Pass
4	Click Event	Click event – Click on "Tech Innovation Workshop" event item	System navigates to event detail page - event/:eventID	System navigates to event detail page- event/:eventID	Pass
5	Verify Page load	Verify page load- Check event detail page loads successfully	Event detail page displays without errors	Event detail page displays without errors	Pass
6	Verify Event Fields	Verify Event Fields- Check event fields are displayed prominently	Verify Event Fields- all fields like Title, Time, Description, etc. display prominently	Verify Event Fields- all fields like Title, Time, Description, etc. display prominently	Pass
7	Verify RSVP status	Check RSVP option – RSVP button is available for student to click	"RSVP" button is visible and clickable	"RSVP" button is visible and clickable	Pass

User Registration

Test Case ID: ATC-010

User Story: As a new user to the event website, I want the ability to create an account with my personal information and appropriate role, so that I can login to access personalized features and manage my event participation.

Scenario: Successful Registration Flow

Preconditions:

- Event website is accessible and functional
- Registration page is available and loading correctly
- Database is operational and can accept new user records
- No existing account with the test email address exists in the system

Test Data:

- First and Surname: John Smith
- Email Address: john.smith@rmit.edu.au
- Password: SecurePass123!
- Confirm Password: SecurePass123!
- User Role: Student
- Expected Success Message: "Registration Successful"
- Expected Redirect: Login page (/sign-in)
- Alternative test roles: Club Organiser, Administrator

Steps:

1. Navigate to the event website homepage
2. Access the registration page
3. Enter first name and last name in the name fields
4. Enter valid email address in the email field
5. Create password meeting security requirements
6. Confirm password by re-entering correctly
7. Select appropriate user role from dropdown
8. Click the "Register" or "Sign Up" button
9. Verify account creation and success message
10. Verify redirect to login page
11. Test immediate login with new credentials
12. Verify role-specific features are accessible

Expected Results:

- New user account is successfully created and stored in database
- Password is securely hashed before storage

- Selected role is correctly assigned to user account
- Success confirmation message is displayed
- User is redirected to login page with "Registration Successful" feedback
- User can immediately login with newly created credentials
- Role-specific dashboard and features are accessible after login

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Homepage	Navigate to Homepage: Access event website homepage	Homepage loads successfully with navigation options	Homepage loads successfully with navigation options	Pass
2	Access Sign Up page	Access Sign Up/Registration: Click "Sign Up" button to navigate to registration page	Registration form displays with all required fields	Registration form displays with all required fields	Pass
3	Enter Details - Name	Enter First and Last Name: Enter "John Smith" in the name fields	Name fields accept input without validation errors	Name fields accept input without validation errors	Pass
4	Enter Details - Email	Enter Email Address: Enter "john.smith@rmit.edu.au" in email field	Email field accepts valid email format	Email field accepts valid email format	Pass
5	Enter Details - Password	Enter Password: Enter "SecurePass123!" in password field	Password field accepts input and masks characters appropriately	Password field accepts input and masks characters appropriately	Pass
6	Confirm Password	Confirm Password: Re-enter "SecurePass123!" in confirm	Confirm password field matches original password entry	Confirm password field matches original password entry	Pass
7	Select User Role	Select User Role: Select "Student" from the role dropdown menu	Role dropdown displays options and accepts Student selection	Role dropdown displays options and accepts Student selection	Pass
8	Submit Registration	Submit Registration: Click "Register" or "Sign Up" button	Form submits successfully without	Form submits successfully without	Pass

			validation errors	validation errors	
9	Verify Success Message:	Check for success confirmation message	"Registration Successful" message is displayed to user	"Registration Successful" message is displayed to user	Pass
10	Verify Database Storage	Verify Database Storage: Confirm new user account exists in database	User record created with hashed password and assigned role	User record created with hashed password and assigned role	Pass
11	Verify Redirect	Verify Redirect: Check redirection to login page	User is automatically redirected to login page (/sign-in)	User is automatically redirected to login page (/sign-in)	Pass
12	Test Login	Test Login: Login with "john.smith@rmit.edu.au" / "SecurePass123!"	Login successful with newly created credentials	Login successful with newly created credentials	Pass
13	Verify Role Assignment	Verify Role Assignment: Check user role is correctly assigned as Student	User account shows "Student" role in database and session	User account shows "Student" role in database and session	Pass
14	Verify Dashboard Access	Verify Dashboard Access: Check access to student-specific dashboard	Student dashboard loads with appropriate features	Student dashboard loads with appropriate features	Pass
15	Verify Password Hash	Verify Password Hashing – Confirm password is hashed in database	Password stored as hash, not plain text in database	Password stored as hash, not plain text in database	Pass

RSVP to Events

Test Case ID: ATC-011

User Story: As a student, I want to be able to RSVP to events, so that I would be on the guest list of the event

Scenario: Successful RSVP to an Event

Preconditions:

- Student account exists with valid login credentials (student@rmit.edu.au / StudentPass123)
- Student is logged into the system
- At least one event exists in the system that the student has not RSVP'd to
- Event is accessible via event details page
- RSVP functionality is enabled for the event

Test Data:

- Student username: student@rmit.edu.au
- Student password: StudentPass123
- Student name: John Smith
- Test Event Details:
 - Event ID: 1
 - Event Title: "Spring Tech Conference 2025"
 - Event Date: 2025-11-15
 - Event Time: 9:00 AM
 - Location: RMIT Building 80, Level 12
 - Initial RSVP Status: Not RSVP'd
 - Expected Button States:
 - Before RSVP: "RSVP"
 - After RSVP: "Going ✓"
 - Expected Confirmation: "Successfully RSVP'd to Spring Tech Conference 2025"

Steps:

1. Login as student with valid credentials
2. Navigate to the event details page for the test event
3. Verify initial RSVP button state shows "RSVP"
4. Click the "RSVP" button
5. Verify student is added to event's guest list
6. Verify RSVP button state changes to indicate success
7. Verify confirmation message is displayed
8. Verify duplicate RSVP prevention

Expected Results:

- Student's name is successfully added to the event's guest list
- RSVP button changes state to "Going ✓"
- Confirmation message is displayed to the student
- System prevents duplicate RSVPs from the same student
- Student appears in the event's attendee list

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Navigate to login page and login as a student: (student@rmit.edu.au / StudentPass123)	Student logged in successfully and redirected to dashboard	Student logged in successfully and redirected to dashboard	Pass

System prevents duplicate RSVP OR removes user from RSVP list by toggling to un-RSVP, and removing the user from the RSVP table	User and the event details don't appear in the RSVP table in the database	User and the event details don't appear in the RSVP table in the database	Pass

Delete Existing Event

Executed on 20/9/2025.

Test Case ID: ATC-012

User Story: As an event organiser, I would like the ability to delete an existing event, so I can remove events that are no longer relevant or have been cancelled

Scenario: Successful Event Deletion by Club Organiser

Preconditions:

- Event organiser account exists with valid login credentials (organiser@rmit.edu.au / OrganiserPass123)
- Event organiser is logged into the system
- At least one event exists that was created by this organiser

- Event is currently visible to students

Test Data:

- Organiser username: organiser@rmit.edu.au
- Organiser password: OrganiserPass123
- Organiser name: Zac Smith
- Test Event Details:
 - Event ID: 1
 - Event Title: "Cancelled Workshop - Database Design"
 - Event Date: 2025-12-01
 - Event Time: 2:00 PM
 - Location: RMIT Building 14, Room 14.9.15
 - Expected Confirmation Message: "Are you sure you want to delete 'Cancelled Workshop - Database Design'? This action cannot be undone."
 - Expected Success Message: "Event 'Cancelled Workshop - Database Design' has been successfully deleted."

Steps:

1. Login as event organiser with valid credentials
2. Navigate to the event details page for the test event
3. Verify "Delete" button is visible for organiser
4. Click the "Delete" button
5. Verify confirmation modal appears
6. Confirm the deletion
7. Verify event is removed from student events listings

Expected Results:

- Confirmation prompt prevents accidental deletion
- Event is completely removed from the system upon confirmation
- Event no longer appears in student events listings
- Event is no longer accessible via direct URL
- Success message confirms deletion

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login: Login as organiser (organiser@rmit.edu.au / OrganiserPass123)	Organiser logged in successfully and redirected to dashboard	Organiser logged in successfully and redirected to dashboard	Pass
2	Go to Event Details Page	Navigate to Event Details: Navigate to /event/1 (Cancelled Workshop - Database Design)	Event details page loads with all event information displayed	Event details page loads with all event information displayed	Pass

3	Delete button	Verify Delete Button Visibility: Check "Delete" button is visible for event organiser	"Delete" button is present and accessible to organiser	"Delete" button is present and accessible to organiser	Pass
4	Verify Current Event Visibility	Check event appears in event listings (/event/all)	Event is visible in all events list page	Event is visible in all events list page	Pass
5	Click "Delete" button	Click the "Delete" button on event details page	Delete action is triggered and club organiser is redirected to the "Confirmation modal" page	Delete action is triggered and club organiser is redirected to the "Confirmation modal" page	Pass
6	Verify Confirmation Modal	A confirmation modal opens with prefilled event details and the message that- "this action will delete the event from the database"	Event data is visible, and warning message is shown	Event data is visible, and warning message is shown	Pass

8	Verify Event List	Verify the Event is deleted by searching it in the: event/all	Event not found	Event not found	Pass
8	ALT: Cancel Deletion	When the organiser clicks "Cancel" instead of "Yes, Delete Event" button (Step 7), the organiser gets redirected to the event detailed view page: /event/1	System redirects to the Events detail page	System redirects to the Events detail page	Pass

Create Club

Test Case ID: ATC-013

User Story: As a club organizer, I want to create a new club easily, so that I can quickly start organizing and managing events for its members.

Scenario: Successful Club Creation by Club Organiser

Preconditions:

- Event organiser account exists with valid login credentials (organiser@rmit.edu.au / OrganiserPass123)
- Event organiser is logged into the system
- Students do not have access in creating a club

Test Data:

- Organiser username: organiser@rmit.edu.au
- Organiser password: OrganiserPass123
- Organiser name: Zac Smith
- Test Event Details:
 - Club ID: 1
 - Club Name: "Tech Club"
 - Club Description: "The following Club..."
 - Club Tag: "Tech"
 - Club Creation Date: 2025-06-02
 - Expected Success Message: Redirects club organiser to the My Clubs Page

Steps:

- Login as event organiser with valid credentials
- Navigate to the "My Clubs" page to view all clubs
- Verify "Create Club" button is visible for organiser
- Click the "Create Club" button
- Provide details for the new club such as (Name, Description...)

Expected Results:

- Club is created
- After successful creation of a club user is redirected to the club list
- If any data provided in the form is missing a validation error is shown

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login: Login as organiser (organiser@rmit.edu.au / OrganiserPass123)	Organiser logged in successfully and redirected to dashboard	Organiser logged in successfully and redirected to dashboard	Pass
2	Go to Event Details Page	Navigate to Event Details: Navigate to /event/1 (Cancelled Workshop - Database Design)	Event details page loads with all event information displayed	Event details page loads with all event information displayed	Pass
3	Delete button	Verify Delete Button Visibility: Check "Delete"	"Delete" button is present and	"Delete" button is	Pass

		button is visible for event organiser	accessible to organiser	present and accessible to organiser	
4	Verify Current Event Visibility	Check event appears in event listings (/event/all)	Event is visible in all events list page	Event is visible in all events list page	Pass
5	Click "Delete" button	Click the "Delete" button on event details page	Delete action is triggered and club organiser is redirected to the "Confirmation modal" page	Delete action is triggered and club organiser is redirected to the "Confirmation modal" page	Pass
6	Verify Confirmation Modal	A confirmation modal opens with prefilled event details and the message that- "this action will delete the event from the database"	Event data is visible, and warning message is shown	Event data is visible, and warning message is shown	Pass
7	Click "Yes, Delete Event" button	When the organiser clicks the Delete event button, the user gets redirected all events page, and a success message is shown "Event deleted"	Success message is shown "Event deleted" and redirected to events page	Success message is shown "Event deleted" and redirected to events page	Pass
7	Check database for confirmation	Confirm if the event is gone from the database by searching the event by id: 1	Event does not appear in the database	Event does not appear in the database	Pass
8	Verify Event List	Verify the Event is deleted by searching it in the: event/all	Event not found	Event not found	Pass
8	ALT: Cancel Deletion	When the organiser clicks "Cancel" instead of "Yes, Delete Event" button (Step 7), the organiser gets redirected to the event detailed view page: /event/1	System redirects to the Events detail page	System redirects to the Events detail page	Pass

Submit Event Feedback

Test Case ID: ATC-014

User Story: As a student who has attended the event, I want to be able to submit a rating and feedback so that I can share my experience and thoughts.

Scenario: Submitting feedback and rating for a past event

Preconditions:

- Student account exists with valid login credentials (student@example.com / StudentPass123).
- The student has RSVP'd to and attended a past event (Event ID: 201, Name: "Workshop B").
- The event has ended (Event Date: 2025-09-20).
- The student is logged into the system.

Test Data:

- Student username: student@example.com
- Student password: StudentPass123
- Event to provide feedback for:
 - ID: 3
 - Name: Workshop B
 - Date: 2025-09-20
 - Location: Sydney
- Feedback text: "Great workshop, very informative!" (28 characters)
- Rating: 4 out of 5

Steps:

1. Navigate to the Event Details page for "Workshop B" in the past events section.
2. Verify the "Enter Feedback" button is visible.
3. Click the "Enter Feedback" button.
4. Verify a text field and rating selector (out of 5) appear.
5. Enter the feedback text: "Great workshop, very informative!" in the text field.
6. Verify the text field accepts up to 200 characters and the entered text is valid.
7. Select a rating of 4 out of 5.
8. Click the "Submit" button.

Expected Results:

- The feedback and rating are successfully submitted.
- A confirmation message is displayed: "Feedback submitted successfully."
- The student remains on the Event Details page.

Test Execution:

Executed on 20/9/2025.

Step No.	Test Step	Description / Data	Expected Result	Actual Result	Pass/Fail
1	Login	Login: Login as student	Student logged in successfully and	Student logged in successfully and	Pass

		(student@example.com/StudentPass123)	redirected to student dashboard	redirected to student dashboard
